

## CNG Industry Veteran Launches Redmark

**Commerce City, Colorado - September 7, 2016** – Redmark today announced its June acquisition of Ward Alternative Energy's vehicle services division and September launch of fueling station services. The company was founded in May of this year by industry veteran Kris Kielty to be the leading CNG/LPG vehicle and fueling station services company in the Rocky Mountain Region. He and key team members have held positions at Natural Fuels, Blue Energy & Technologies, Clean Energy Fuels, FuelTek, and Ward Alternative Energy since 1990. Together, they have supported thousands of CNG/LPG vehicles and dozens of fueling stations for hundreds of fleets.

The team at Redmark reflects the values its founder has learned over many years by delivering quality work on schedule to each customer. Redmark's President Kris Kielty said, "In an unreliable world, there is nothing as refreshing as customer service, reliability and expertise. I believe that Redmark is the best partner a fleet can have, whether it's ensuring their vehicles run each day on natural gas fuels or the fueling stations always dispense CNG. The Redmark team knows that fleet vehicles can never miss a roll-out."

Redmark is among a limited number of Ford Qualified Vehicle Modifier (QVM) program partners. Ford only offers its CNG and LPG vehicles through QVM partners like Redmark. For other on-highway applications and specialty vehicles, Redmark is a distributor for leading aftermarket fueling systems and is an OEM partner for Tug Manufacturing, among other OEMs. The company has ASE master and CSA certified technicians on staff, provides training and support to OEM vehicle dealerships, stocks key parts and supplies, and offers road-side fueling and service.

Redmark's fueling station O&M services provide 24/7 support of public and private CNG stations along the I-25 corridor in Colorado and Wyoming. Customers may choose the types of station service that best meet their needs including routine maintenance, scheduled maintenance, call-outs, repairs, remote monitoring and analytics. Company station technicians are factory trained and operate fully stocked service trucks. Redmark's parts warehouse and equipment repair shop support fueling station customers with fittings, supplies and fabrication services unique to the industry.
